

The following is the Broad Agency Announcement used in the last solicitation:

**Amendment to Broad Based Agency Announcement # DE-PS26-02NT41613.  
(Area of Interest 1- Combustion Systems)**

Add the following Subtopic 6- Combustion Technologies University Alliance-Applied Research

**Subtopic 6- Combustion Technologies University Alliance (CTUA)-Applied Research**

CTUA seeks applications for research and development activities that promote applied research in combustion technologies by the U.S. Colleges and Universities. Research topics to be addressed by the proposals include all the aforementioned five subtopics and the following topics in combustion such as, emission, fuel, combustion, byproducts, and Vision 21. Approximately \$75,000 funding per proposal is expected to be available to initiate the selected research efforts. Subsequent funding for selected projects will depend upon the availability of future year appropriations, as well as upon satisfactory progress towards project goals and deliverables. The size of the CTUA proposals is limited to five (5) pages including budget.

**Other subtopics include:**

- Supercritical/Ultra-supercritical
- Chemical looping
- Oxygen combustion
- High pressure high temperature filters
- General Improvements including Plant Reliability Improvement And Emissions Reduction (PRIER)

Please identify ideas for new R&D areas for future solicitation. E-mail your ideas to Larry Shadle at [lsHADL@netl.doe.gov](mailto:lsHADL@netl.doe.gov).
